ITEM 1. Proposed Project

LE activities on the Mendocino NF include public information, education and enforcement, incident management, resource monitoring and protection, crime prevention, restitution, signing and barrier installation consistent with the Forest's "OHV Law Enforcement Plan." The LE Plan provides patrol coverage for public safety, wildlife, soils and habitat protection while sustaining OHV recreation opportunities on 252 miles of motorcycle, ATV and 4WD/dune buggy routes, 1,152 miles of roughly graded roads and 10 acres of open riding area within the Forest's 914,000 acres. These routes are complemented by six highly developed OHV staging areas. The Plan supports enforcement of all laws pertaining to OHV operation; emphasizing noise levels, resource protection and prevention of OHV trespass. LE activities stress public contact, face-to-face information and education, violation prevention, signing and protective barrier installation. MNF's OHV program is widely known as a "model" of successful and innovative management by both the OHV community and environmental interest groups.

This request supports U.S. Forest Service direction requiring OHVs on public lands to be "controlled and directed so as to protect the resources of those lands, to promote the safety of all users of those lands and to minimize conflicts among the various uses of those lands (Travel Management Rule – November 9, 2005, 36 CFR part 212)."

Over the last five years OHV visitation on the MNF has increased 16%, from 128,798 to 152,714. Patrols provide interaction with the OHV public; reaching beyond the staging areas to the Forest's extensive trail system and remote areas. The MNF provides family oriented OHV recreation, and maintains a history of diligent enforcement of OHV laws indicative of these efforts.

The following OHV law enforcement statistics were recorded in 2006 and 2007: 113 Violation Notices (2006) / 115 (2007); 76 Warning Notices (2006) / 78 (2007); 69 Incident Reports (2006) / 70 (2007); 13 Violation of State Law (2006) / 52 in (2007).

LEOs patrol in the OHV emphasis areas on a regular basis. Funding for reoccurring LEO patrol is not requested in this grant application. On holiday weekends LE will provide extended coverage up to 12 hours each day, including night patrols This is the only grant funding requested for LEO staff. LEO coverage is augmented by 42 pay periods shared by up to six FPOs. FPOs enforce most OHV related laws as well as other resource, recreation and use related laws. OHV LE coverage is further supported by Cooperative Law Enforcement Agreements with Colusa, Tehama, and Lake County Sheriff's Offices. These agreements provide extra coverage for county officers to assist during OHV events and holiday weekends. The use of radar and GPS units, Alcohol Screen Devices, and decibel meters are integral for dealing with all aspects of OHV LE in an accurate and professional manner. The Forest has conducted sound checks during 22 organized Enduro events, 11 courtesy sound-check clinics and hundreds of routine and visitor requested compliance tests. In 2006, 17 injury accidents were recorded, with nine recorded in 2007. All OHV Technicians, FPOs, and LEOs are trained to assist the Sheriff's Office in Search and Rescue and injury accidents.

Maps, brochures, and signs are provided at staging areas, administrative sites and along Forest access routes. The MNF website provides updated information including current operating conditions and closures, as do 24-hour telephone recordings.

The Forest is experiencing a significant increase in hunters using ATVs. Funding assistance will continue efforts to educate this user group about the importance of staying on designated routes, spark arrestor requirements, legal sound levels, registration, riding double and helmet laws. Labor and cost effective no-dig barriers, fencing and gates were invented on the Mendocino NF and provide protection to sensitive resource and restoration areas.

Volunteers continue to play an important role in OHV enforcement efforts by helping to educate OHV users and by observing and reporting violations. Volunteer efforts include pre-event sound testing and spark arrestor checks and post event route condition evaluations. Volunteers also assist with traffic control during OHV events. The Colusa County Sheriff's Volunteer Civilian Search and Rescue Team provides on-site emergency response coverage for all enduro events hosted on the Grindstone RD.

ITEM 2. Project Coverage

MENDOCINO

Within the congressional boundary of the Mendocino NF are approximately 914,000 acres of national forest system lands. The LE Plan provides patrol coverage for public safety and protection for wildlife, soils and habitat while sustaining OHV recreation opportunities on 252 miles of motorcycle, ATV and 4WD/ routes. In addition to the designated OHV routes, there are 1,152 miles of roughly graded roads and 10 acres of open riding area legally accessible to OHVs within the Forest's 914,000 acres. These routes are complemented by six highly developed designated OHV staging areas. This encompasses those portions of the counties of Tehama, Glenn, Colusa, Lake and Mendocino within the congressional boundary of the Mendocino National Forest.

ITEM 3. Describe the frequency of the patrols

MENDOCINO and SIX RIVERS

Law Enforcement Officers (LEOs) and Forest Protection Officers (FPOs) will provide regular reoccurring patrols of the OHV emphasis areas during the OHV season and hunting season which would primarily consist of all weekends and holidays for the enforcement of OHV laws, resource protection and public safety. LEOs and FPOs will also provide additional patrols on all special events including Enduros and Dual Sport events.

FPOs generally work during the daylight hours. They will provide the needed enforcement presence during these times, specifically in those areas accessible by vehicle. The FPO patrols will be augmented by LEOs who have staggered days off during the week but are available 24/7 for incident response.

ITEM 4. Deployment of Personnel

Law Enforcement staffing on the Mendocino and the Six Rivers NFs has increased from six in 2007 to eleven currently. This staffing level allows for shift flexibility and increased coverage throughout the OHV season. At any time, any number of the eleven LEOs can be pulled from their respective areas and assigned to the "hot spots."

The Mendocino is staffed with seven full range Law Enforcement Officers and seven Forest Protection Officers. In addition, during the four major holiday weekends (Thanksgiving, Martin Luther King, Presidents Day and Easter) up to four full range Law Enforcement Officers are deployed from the surrounding forests. During these holiday weekends and special events, LEO shifts are staggered to better meet the needs of the public and to ensure safety for both the riders and FPOs.

APP # 700293

Law Enforcement - Page 1

1. Identify areas with high priority law enforcement needs because of public safety, cultural resources, and sensitive environmental habitats, including wilderness areas and areas of critical environmental concerns:

On the Mendocino NF, the Fout Springs OHV Staging Area (which includes Davis Flat, North Fork, South Fork, Mill Creek, Old Mill and Mill Valley), Little Stony OHV Staging Area, Grassy Patch, Rattlesnake Ridge and Doe Peak on the Grindstone District and Deer Valley OHV Staging Area, Penny Pines, Middle Creek OHV Staging Area, Lake Pillsbury Basin, Catfish Pond (Snow Mountain Wilderness is adjacent) and the Yuki Wilderness Corridor on the Upper Lake District are the highest enforcement priorities for the Mendocino NF. Each of these areas have cultural resources as well as sensitive habitats which must be protected by the enforcement of OHV regulations for public safety are paramount.

2. Describe how the proposed Project relates to OHV Recreation and will sustain OHV Recreation, motorized off-highway access to non-motorized recreation, or OHV Opportunities associated with the Project Area:

The proposed project is specifically directed towards the enforcement aspect of OHV recreation management. Engineering, education and enforcement are ongoing processes conducted by Forest OHV management personnel to ensure sustained OHV recreation on the Forests. Forest enforcement personnel educate the public and when necessary, enforce OHV and resource related regulations to provide two legs of the management triangle. The project will provide additional funding to maintain and improve the presence of enforcement personnel for education and enforcement.

3. Describe the Applicant's formal or informal cooperation with other law enforcement agencies:

The law enforcement agencies with geographical and jurisdictional commonalities with the Mendocino National Forest include: Tehama County Sheriff's Office, Glenn County Sheriff's Office, Colusa County Sheriff's Office, Lake County Sheriff's Office, Mendocino County Sheriff's Office, California Department of Fish and Game, and California Highway Patrol. The Forest Service currently has law enforcement patrol agreements with all five counties to document formal cooperation and reimbursement for law enforcement activities, including OHV enforcement, on national forest system lands.

Informal cooperation occurs on a daily basis between officers in the field.

Law Enforcement - Page 2

4. Does the Applicant recover a portion of the law enforcement costs directly associated with privately sponsored OHV events where sponsors have obtained a local permit? ☐ Yes ☒ No
(Please select Yes or No)

Explain

Although fees are collected in return for issuance of a permit for an event on national forest system lands these fees are not a significant source of funding and are routinely maintained for management of the permitting process.

5. The Applicant agrees to implement a public education program that includes information on safety programs available in the area and how to report OHV violations? ☒ Yes ☐ No
(Please select Yes or No)

6. Describe the Applicant's OHV law enforcement training program including how the training program educates personnel to address OHV safety and natural and cultural resource protection:

Mandatory OHV safety training is required before agency personnel can operate OHVs in the performance of their duty. This training ensures that enforcement personnel can educate the public on OHV safety and address unsafe OHV operation.

In addition, Forest Service enforcement personnel are specifically trained to identify and address natural and cultural resource protection. These skills are inherent to their duties.

Law Enforcement - Page 3

7. Is the proposed project in accordance with local or federal plans and the OHMVR Division Strategic Plan? (Please select Yes or No) ☒ Yes ☐ No
8. LOCAL AGENCIES ONLY - Describe the Applicant's policies and/or agreements regarding enforcement on federal land:
9. COUNTIES ONLY - Describe how the OHV in-lieu of tax funds are being used and whether the use of these fees complements the Applicant's project:

Law Enforcement - Page 4

10. APPLICANTS WHO MANAGE OHV RECREATION FACILITIES – Describe how your organization is meeting its operation and maintenance needs:
The Mendocino and Six Rivers NF Patrol District does not operate or manage OHV recreation facilities.
11. The Applicant agrees to enforce the registration of OHVs and the other provision of Division 16.5 commencing with Section 38000 of the vehicle code and to enforce other applicable laws regarding the operation of OHVs? (Please select Yes or No) ☒ Yes ☐ No

ITEM 1 and ITEM 2

ITEM 1

- a. ITEM 1 - Has a CEQA Notice of Determination (NOD) been filed for the Project? ☐ Yes ☒ No
(Please select Yes or No)

ITEM 2

- b. ITEM 2 - Are the proposed activities a "Project" under CEQA Guidelines Section 15378? ☐ Yes ☒ No
(Please select Yes or No)
- c. The Application is requesting funds solely for personnel and support to enforce OHV laws and ensure public safety. These activities would not cause any physical impacts on the environment and are thus not a "Project" under CEQA. (Please select Yes or No) ☒ Yes ☐ No
- d. Other. Explain why proposed activities would not cause any physical impacts on the environment and are thus not a "Project" under CEQA. DO NOT complete ITEMS 3 – 9

ITEM 3 - Impact of this Project on Wetlands

ITEM 4 - Cumulative Impacts of this Project

ITEM 5 - Soil Impacts

ITEM 6 - Damage to Scenic Resources

ITEM 7 - Hazardous Materials

Is the proposed Project Area located on a site included on any list compiled pursuant to Section 65962.5 of the California Government Code (hazardous materials)? (Please select Yes or No) ☐ Yes ☒ No

If YES, describe the location of the hazard relative to the Project site, the level of hazard and the measures to be taken to minimize or avoid the hazards.

ITEM 8 - Potential for Adverse Impacts to Historical or Cultural Resources

Would the proposed Project have potential for any substantial adverse impacts to historical or cultural resources? (Please select Yes or No) ☐ Yes ☒ No

If YES, describe the potential impacts and for any substantially adverse changes in the significance of historical or cultural resources and measures to be taken to minimize or avoid the impacts.

ITEM 9 - Indirect Significant Impacts

CEQA/NEPA Attachment
